

CHILD CARE

VALUE PROPOSITION

I expect that high quality licensed child care is accessible, affordable and responsive to my child's needs in a safe and secure environment.

KEEP IN MIND: Influencing Factors

Influencing factors can create variances in comparison data from year-to-year and from municipality-to-municipality.

Data Availability

LICO (Low Income Cut-off) and National Household Survey data may not be current, and future predictions may not be accurate

Demographics

Population density and dispersion varies by municipality

Funding

Dependent on Provincial budgets and Municipal funding

Licensed Spaces

Municipalities do not independently direct or drive growth of licensed spaces

Mix of Child Care Spaces

Different levels of service and cost per age group

Child Care

Figure 4.2 Percent of Spaces that are Subsidized

The results illustrate that high demand can be indicative of the number of lower-income families requiring child care. Other factors contributing to the results include total funding and the growth in total number of spaces created. This measure reflects the number of full day equivalents (FDE) as opposed to the actual number of children served.

Child Care

Figure 4.4 Total Cost per Child (12 and Under) in the Municipality

This measure reports the total cost to provide child care services for children 12 years and under and includes all funding sources. Increases to the 2018 'cost per child' reflect increased 2018 Provincial funding, a portion of which was one-time funding.

Child Care

Figure 4.5 Annual Child Care Cost per Normalized Subsidized Child Care Space

The annual gross fee subsidy cost has been normalized to reflect the mix of age groups and required staff ratios. A high cost result could reflect spaces that are being directly operated by a municipality as well as a higher cost of care in urban cities. There are opportunities to help support the cost of fee subsidy through other funding grants which may not be reflected in this measure.
