

9 Facilities

What is the Service?

Facilities Management delivers a variety of services that support municipal service delivery and provide a healthy, safe, barrier-free and comfortable environment for staff and citizens that visit municipally owned and/or operated properties.

Services provided vary between municipalities, but may include:

- Accessibility Design Standards
- General Repairs, Maintenance and Shipping and Receiving
- Space Planning
- Tenant Relations

The range of municipal service areas and programs that Facilities Management may serve varies from municipality to municipality, including but are not limited to:

- Arenas and Recreation Centres
- Emergency Medical Services
- Housing
- Long Term Care
- Museums
- Police Services
- Public Health Services

Influencing Factors:

Building Stock: Wide variety of buildings/facilities in each municipality with different sizes, ages, and use profiles can yield very different cost per square feet indicators.

Capital: Accounting policy/dollar threshold for capital expenditures impacts the types of maintenance activities included in operating costs.

Organizational Form: Extent to which asset management services are centralized or decentralized in each municipality can influence reported results.

Facilities

What is the total square footage of all buildings owned and leased by the Municipality?
