KEEP IN MIND:

Influencing Factors

Influencing factors can create variances in comparison data from year-to-year and from municipality-to-municipality.

Complexity

Size and technical complexity of permit applications and construction work

Economic Conditions

State of the local economy, interest rates and employment conditions can affect investment in building stock

Geography

More travel time and fewer inspections can result in higher costs per permit

Inspection Services

Nature of inspection process may vary

Legislative Changes

Revisions or new Acts and Regulations adds time to the review and inspection process

Municipal Policy

Varying permit requirements per jurisdiction

Fig. 2.1 Number of Residential and ICI Building Permits Issued in the Fiscal Year

This measure includes residential and ICI (Industrial, Commercial and Institutional) building permits issued. Building Permits are defined as “permits required for construction” and are subject to the respective Building Code Act of each province.

IMPORTANT: The definition for this measure was changed to exclude “other building permits”. In most cases, the removal of “other building permits” was not material; however, the variance between 2017 results and that of prior years may be due to this change.

Windsor: The City experienced an increase in residential work, partly due to the basement flooding subsidy program.

Fig. 2.2 New Residential Units Created per 100,000 Population

This is an economic indicator that highlights development trends in a municipality. Typically, there is a correlation between the number of new residential dwelling units, population growth and the overall economic growth of a municipality.

Windsor: There were fewer new residential units built in 2017 despite an increase in population

Fig. 2.3 Operating Cost of Building Permits and Inspection Services per \$1,000 of Residential and ICI (Industrial, Commercial and Institutional) Construction Value

This measure represents the operating costs associated with the provision of building permits and inspection services. The fluctuation in year over year results is impacted by the value of residential and ICI construction activity.

IMPORTANT: The definition for this measure was changed to exclude “other building permits”. In most cases, the removal of “other building permits” was not material; however, the variance between 2017 results and that of prior years may be due to this change.
